- Extras

Welcome to Maritime Home

Maritime Home is a privately owned company, established by a group of manufacturers and service industry companies, with a mandate to export quality Canadian products; products of distinction.

Maritime Home has been extremely fortunate to have an existing export knowledge base as a starting point. Furthermore, Maritime Home has had the support and encouragement of Maple Homes International, who have assisted in improving and enhancing our product delivery.

When Maritime Home was started, the business model was based on the proven successes of Atlantic Canada Home. These successes revolve around the ability to source and deliver products. And that defines Maritime Home's approach today. Maritime Home's focus is providing the products requested, in a timely manner, packaged and documented so they arrive at the customers site as expected.

While Maritime Home specializes in finish materials such as Windows, Doors, Kitchens and Mouldings, we will source all the materials needed to meet your requirements.

To ensure complete satisfaction, Maritime Home loads our own containers. This allows them to maintain full control of the process all the way from product request, right through to product delivery

From our headquarters in Cornwall, Prince Edward Island, and our consolidation center in Dieppe, New Brunswick Canada, Maritime Home is strategically positioned to ship house packages or building materials anywhere in the world. All locally manufactured material is shipped weekly from Halifax, Nova Scotia, an international port located in Eastern Canada. Maritime Home also ships containers from Vancouver, British Columbia, situated on Canada's west coast.

Our largest market is Japan, where Maritime Home has experience exporting materials since 1996. In 1999 we began shipping houses to Germany and in 2000 sales expanded to Ireland.

Much of our export success can be attributed to our ability to provide quality Canadian building materials and services that meet the exacting and often unique requirements of an international marketplace

Steven McFeeters , President.

Steven has a degree in Mathematics and Computer Science and spent 13 years in the Banking industry, working for the multinational Citigroup. When he relocated to Prince Edward Island in 1996, he used the opportunity to built his first custom home. Through this experience he soon became active in Atlantic Canada Home and developed an understanding of the export building products market. He leveraged this knowledge to facilitate the birth of Maritime Home Inc..

Adam Saunders, Vice President

Adam has a background in building construction and has been working in the construction industry since 1995. In 03-04 Adam achieved an International Export Diploma at The University of PEI. Through his work at Atlantic Canada Home Adam gained insight into the export industry and has proven to be a valuable asset to Maritime Home. Here Adam is responsible for logistics and sales. He has traveled internationally to Japan, Ireland, UK and has found the experience vital in understanding customer requirements

Product Information

Maritime Home prides it's self on the quality of products that we are able to offer to our customers. Our suppliers are large enough to be able to meet the demands of our global customer base, yet small enough to still value each customer like they were their only customer.

Triangle Kitchen's has always understood that kitchen designs should not be limited to utilitarian functions. They should be guided by imagination, with an attention to detail that sets them apart. This is the vision at **Triangle Kitchen**, motivating them to produce fine cabinetry products that are specifically tai-

lored to the unique needs of our clients. From kitchens to bedrooms to bathrooms, **Triangle Kitchen** carry a wide range of materials, finishes and accessories to add that special touch of storage and style to any environment in your home.

Creating stylish room solutions has never been more exciting or easy.

MBF Windows was originally established in 1855. Individual contact and concern to satisfy customer's needs is the vision that has been passed along from one generation on to the next.

Century Series of vinyl windows is one of their latest product lines.

This series was designed and engineered to take advantage of the most innovative, efficient production and manufacturing processes. These significant economies are passed directly on to the consumer—so you'll start saving the moment you buy them.

MBF Windows is a well-established company in northern New Brunswick, where time has moulded it into a precious stone, ready for the next millennium. This fifth generation company is more than ready to carry out the company's tradition of excellence.

Prince Edward Mouldings is Prince Edward Island's premium supplier of wood mouldings. Serving local customers as well as clients around the globe, they provide a personal touch and pay close attention to detail. With a complete line of standard mouldings, as well as the ability to create custom or replicate vintage designs, their commitment to customer satisfaction is matched only by the importance they place on quality work.

For clear or stain grades orders, they recommend red oak, sugar maple, yellow birch, and clear or knotty pine. For paint grades they recommend finger jointed or poplar. Other species are available upon request and all wood is kiln-dried to a moisture content of less than 8 %.

To ensure that no moisture is picked up during shipment, several pieces are bundled together and placed into a poly sleeve sealed at both ends. The bundles are then carefully labeled as to their contents.

At no extra charge, **Prince Edward Mouldings** will pre-cut your mouldings, saving you time and cutting down on waste. This has been an extremely popular service with many local builders, especially when more "precious" hardwoods are used.

With their own grinding facility, they have the capability of cutting knives to produce any profile you desire whether that be to match an existing profile or creating your own custom design.

Products for Homes of Distinction

Southwest Forge specializes in ruggedly beautiful hand-forged exterior gripsets that add personality to any home. Their solid construction and durable finish makes them a great long-term investment in your house.

These handsome gripsets are available in various finishes as either handle-to-lever mortis configurations (for smooth operation and maximum security), or as dummy sets.

When making a good first impression is important, these gripsets do the job!

Dominion Stair Company's exceptional quality and attention to detail has made them the premier pre-finished; pre-assembled stair supplier in Atlantic Canada. Dominion Stairs, manufactures custom stairs for any project, no matter the complexity. Curved, spiral, straight, U-shape double helix, metal/wood, cherry, oak, maple - all possibilities which are within their reach. Dominion Stairs attention to workmanship, will impress the finest finish carpenters, and the shrewdest of customers. All orders are wrapped and protected for transportation and come

with complete instructions for your ease of installation. Why build stairs when you can order them?

While we have spotlighted several of our key products, Maritime Home also has a full range of building products to complete any project. We offer a full range of doors, from solid wood in a variety of species and designs, right down to hollow core interior doors. No modern timber frame home would be complete without a ventilation system sized to matched the living space being built, and we have the expertise to ensure you get the unit your job requires. Being a Canadian company we also have access to excellent quality hardwood flooring, in a variety of species, grades and sizes. Excellent products, attention to detail and superior customer service make Maritime Home the finish material supplier of choice.

The Global Movement of Goods

The Global Movement of goods has been going on in Canada since it was discovered by the Vikings almost a 1000 years ago. Of course now it is more sophisticated.

Goods are delivered to our loading facility in Dieppe New Brunswick. These goods arrive pre-packaged from our suppliers, and are "assembled" in ocean going containers, so they will arrive at their respective job site as they left our facility.

During the loading of the container, the materials are inspected for damage, photographed, labeled and loaded on to the container. They are fastened, wrapped, palletized, and or screwed to the deck of the container. Upon completion of the loading of the container, it is picked up by local transportation company and transported to the port of Halifax, where it is loaded on to an ocean going vessel.

Kintetsu World Express (KWE) handles our logistical support, taking care of both our air shipments and our ocean cargo. The ocean transit time from Halifax to Dublin ranges from 9 to 12 days.

Goods are then delivered to your facility via local trucking companies.
